

DSS IN TRANSITION

Partnering with Industry to Protect National Security

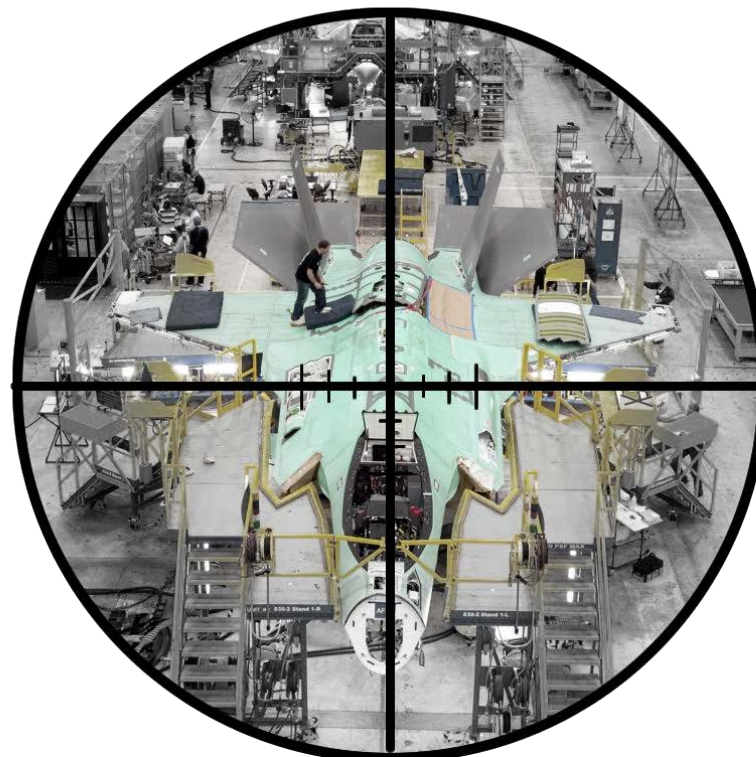

Agenda

- Need for Change
- Moving Ahead
- New DSS Methodology
- Current Actions
 - Integrated Process Teams (IPTs)
 - Communications
 - Organization
- “WIFM”
- Next Steps

Need for Change

**The U.S. is facing
the most significant
foreign intelligence
threat it has ever
encountered**

Moving Ahead

“We are changing the way we protect National Security Information & Technologies”

- **National Industrial Security Program (NISP) designed for vastly different time**
- **Moving to an intelligence-led, asset-focused, and threat-driven approach that:**
 - ✓ Identifies assets that need protection
 - ✓ Considers the threat & vulnerabilities
 - ✓ Partners with cleared industry to develop tailored security programs

New DSS Methodology

PRIORITIZATION

Major Input:

Prioritized Technologies / NIPF Priorities / All-Source

Also:

F{TVI}Assessments
Technology Trends Report
On The Ground Understanding

Plan for Allocating Resources

Improve opportunity to identify threat or vulnerability

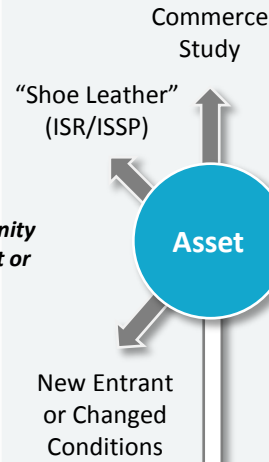

Also:

DSS Director Strategic Guidance
Past SVAs
Business Analysis

FUTURE INPUTS

ASSETS

IDENTIFY ASSET

* FCB to Sustain Asset List

TVI ANALYSIS & REVIEW

ANALYSIS

Points of Contact

V1			
	V2		
	V3		V4

12x13 Matrix

+

NISPOM

F1
F2
F3
F4

Continuously walk through 12x13 matrix to tailor assessment at facility

REVIEW

TVI Review

- V1: _____
- V2: _____
- V3: _____
- V4: _____
- F1: _____
- F2: _____
- F3: _____
- F4: _____

TVI Analysis and Review is jointly developed with facility security, and involves PM as needed

TAILORED SECURITY PROGRAM

Data Generated Feeds Future Prioritization

Collaboratively developed with DSS, Facility, and PMs to define countermeasures

- Validate Countermeasure Implementation & Value
- Assess Effectiveness
- Use MOEs for Continuous Improvement

Current Actions: IPTs

Cross-Directorate integrated process teams (IPTs) being formed to:

- Develop draft Concept of Operations (CONOPS)
- Pilot, refine, and validate the CONOPS
- Integrate each component in the new methodology

Working Terms

Asset Identification

Prioritization

**Threat, Vulnerability,
& Impact (TVI) Analysis
& Review**

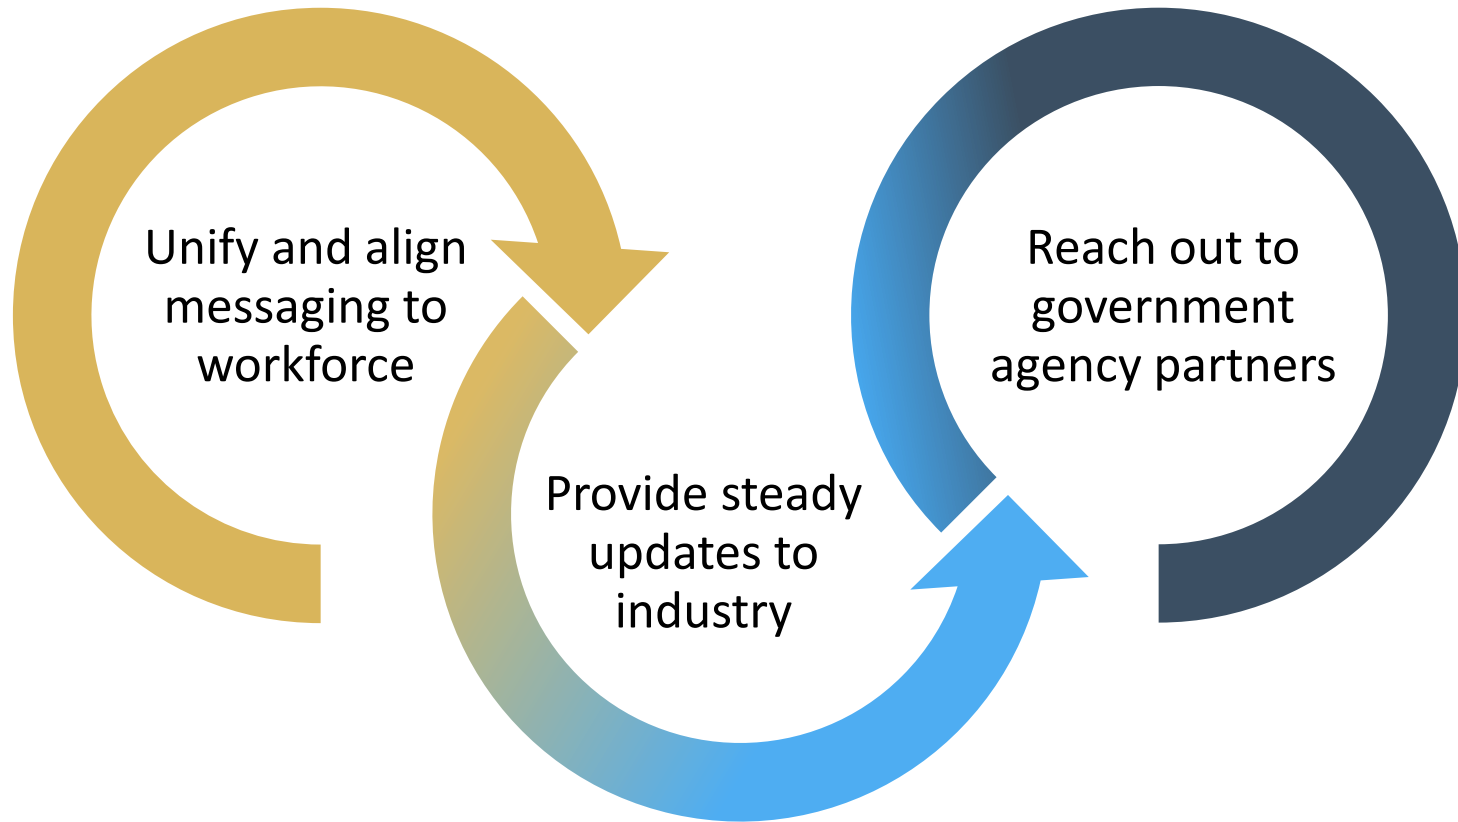

**Tailored Security
Programs**

Current Actions: Communications

DSS in Transition Communications Plan has been developed to:

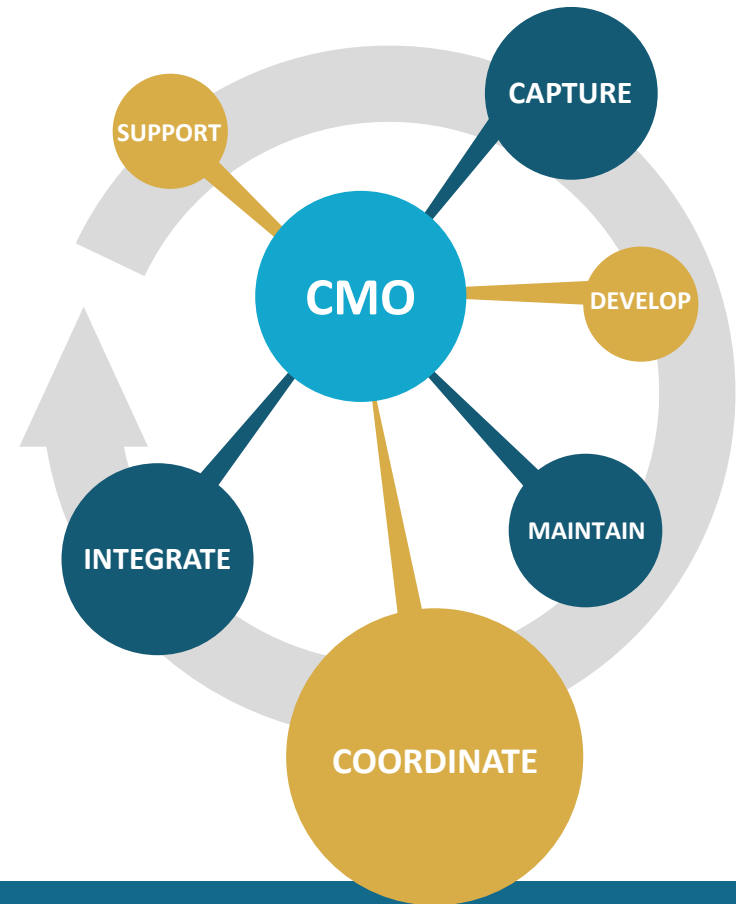

Current Actions: Organization

DSS in Transition Change Management Office (CMO) established to:

- Develop and maintain the change management methodology
- Coordinate and support enterprise-wide change activities
- Capture lessons learned and integrate them into the change management methodology

“WIFM”

DSS in Transition will benefit Cleared Industry by:

Identifying assets
at their facilities

Working together to
identify asset
vulnerabilities

**Securing our
collective future**

Developing tailored
security programs

Sharing threats and
information about
assets

Next Steps

DSS in Transition is planning to:

- ▲ Pilot each component in the new methodology through summer 2017
- ▲ Increase connection with industry
- ▲ Engage more actively with GCAs
- ▲ Expand communications internally and externally
